### **1. LW\*T RAP TRO**

some people came 2 me and said: L!ghtworker\*T  
come on and rescue me show me ya philosophy.  
I answered, that the key is having energy  
and 2 make U see, I give U my CD. Enjoy!

## **2. THERE 'RE ANGELS OUT**

I'm driving with my car  
feeling being like a star  
sunroof open to the sky  
and my love will never die, forever I will fly  
cause I have no doubt - there 're angels out

swimming naked in the sea  
washing patterns 'way from me  
all my thoughts are passing by  
and my love will never die, forever I will fly  
cause I have no doubt - there 're angels out

so look up in the sky  
and watch the angels fly  
they coming over you  
there 's nothing else to do  
believe, just believe

making music I feel fine  
all all all the happiness is mine  
smiling, shaking, breaking time  
and my love will never die, forever I will fly  
cause I have no doubt - there 're angels out

chill-out lying in the grass  
I love this best, I really like it – don 't discuss  
colours, flowers, flavours - I get high  
and my love will never die, forever I will fly  
cause I have no doubt - there 're angels out

so look up in the sky...

## **3. MASTER SAINT GERMAIN**

Master Saint Germain (please) please help again  
send me your violet flame that I am  
(I 'm) calling Saint Germain please help, I know U can  
send me your violet flame that I am

U know, I 'm on my way... it 's so hard the day  
fill up the hole in me, I need energy  
send your love in meditations, make me strong and gimme patience  
there 's a lot of to do to leave the blues

Master Saint Germain (please) please help again  
send me your violet flame that I am  
(I 'm) calling Saint Germain please help, I know U can  
send me your violet flame that I am

U know, that I am working on my spirituality  
I want the light, the best possibility  
to be in love and so harmonious, find ya home in every town  
to be in balance from the base up to the crown

Master Saint Germain (please) please help again  
send me your violet flame that I am  
(I´m) calling Saint Germain please help, I know U can  
send me your violet flame that I am

U know, that I am fighting for my friends love and peace  
gimme support by what I do, I trust in U  
by making party, in celebrations U´re my connection, the healing fascination  
put a smile on my face, gimme might and knowledge

Master Saint Germain (please) please help again  
send me your violet flame that I am...

#### **4. SURE 2 FIND**

Tried my best in so many cases  
Gave my heart for it and this.  
Put my trust in so many faces  
The result was lost in space.

Instead of it - I believe in love  
I am sure to find.

Giving parts of my own experience  
To someone who needs a lot.  
Listening to sounds of silence  
Communicate with God.

Because of it - I believe in love  
I am sure to find.

Building seats in my own cathedral  
There´s a guy who needs a place.  
Looking down 2 third world´s obsession  
They´re fucking down the coloured race.

Instead of it - I believe in love  
I am sure to find. (so sure)  
Instead of it - I believe in love  
I am sure to find.

## 5. LITTLE HARMONY

When I look in my coffee-cup,  
I can't see, how much time I've got.  
I can't see if tears will fall,  
if problems grow, small or tall.

But what I know - that things will grow.  
Cause all I need to be happy - is a little harmony.

When I look in your elf's-eyes,  
I see there's hardly a disguise.  
I don't know, if our love will last,  
or if I'll stay in ugly past.

But what I know - that things will grow.  
Cause all I need to be happy - is a little harmony.

When I look into my future there  
are many things, that I would wish.  
A many things for my best dish  
to comfort me and you to see.

That things will come - and time will run.  
A little gift for you and me - is a little harmony.

And what I know - that things will grow.  
and all I need to be happy - is a little harmony.

## 6. CASTLE COUNTRY

I'm living in a castlecountry - every woman's a queen  
I'm living in a castlecountry - every man's a king  
I'm living in a castlecountry - holy waters are clean  
I'm living in a castlecountry - everything's a big thing

castlecountry - I never go away  
castlecountry - so much you cannot pay

I'm living in a castlecountry - where the sunshine's bright  
I'm living in a castlecountry - everybody's got the light

castlecountry - I never go away  
castlecountry - so much you cannot pay

destiny and harmony is good for me - and I can feel free  
destiny and harmony is good for me - without I can't be

I'm living in a castlecountry - our love's intact  
I'm living in a castlecountry - it's perfect nature in fact

castlecountrý - I never go away  
castlecountrý - so much you cannot pay

destiny and harmony is good for me - and I can feel free  
destiny and harmony is good for me - without I can't be

I'm living in a castlecountrý - every man's a king  
I'm living in a castlecountrý - every woman's a queen

castlecountrý...

## **7. 2 FEEL FREE**

I see the light on the horizon  
I feel the glimmer on my head  
I wish much more of green would come in2 my brain  
I smell the glory in my breath

I am alive, I'm on my way  
I'm goin' to learn on every day  
2 feel free...

I like the fruits fresh from our nature  
sometimes I find my paradise  
I climb the top of any mountain in my near  
believe and make no compromise

I am alive, I'm on my way  
I'm goin' to learn on every day  
2 feel free...

I try to unchain my spirit  
I let it out and let it in  
the elements will give support for you and me  
let's take the train of harmony

I am alive, I'm on my way  
I'm goin' to learn on every day  
2 feel free...

## **8. HOLD ON 2 THE LIGHT**

Hold on 2 the light – hold on 2 love.  
Close 2 the tide - it's coming up strong, on and on.

So I - I learn to fly. High - high up - high to the sky.  
And you - you should do - like I try to do. On and on.

Hold on 2 the light – hold on 2 love.  
Close 2 the tide - it's coming up strong, on and on.

Believe, believe - you are the chief, the chief.  
Come on, stand up – do not grieve.  
Try to be aware - 'bout what you care.  
It's very necessary - on and on.

Please shine - as strong as possible -  
we will need it - day and night.  
Don't stop - filling us full and bright -  
to reach forever lasting delight.

Hold on 2 the light – hold on 2 love.  
Close 2 the tide - it's coming up strong, on and on.

Get free to see - the guarantee -  
that unconditional - love can be.  
And when we all will find this way,  
everyone will feel alright, the earth has turned ok.

Hold on 2 the light – hold on 2 love.  
Close 2 the tide - it's coming up strong, on and on.

## **9. I AM RIGHT**

And I swear - all the things - that I do - I do for me  
And I swear I will bring you - the same way to see  
I know you are go-o-o-od, cause I see in your soul  
I know you are cra-zy-y, still you are a fool

But I swear - I am right - on your side  
And I swear - I am right - on your side

And I swear I will help you - to open up your eyes (I's)  
Go down on your knee-e-es - and feel - the floor of ice  
By the light to you I swe-ar, in my life I won't stop  
Tracking you to see yourself - clear and clean to the top

And I swear - I am right - on your side  
And I swear - I am right - on your side

That's the only way we can live, but you have to forgive  
Diggin' in the shit you did, that is not what you should live  
Listen I love you so mu-ch, cause we are still in touch  
To find me inside of you, I can see so much

And I swear - I am right - on your side  
And I swear - I am right - on your side

So believe (me) the right way for ya - is yourself to give up  
Do it as I did it too - and then no one can stop  
Love we need - to succeed - I feel strong  
//:And I know - that I am right, cause you - listen 2 this song://

You listen 2 my song.

## **11. I TAKE U EVER**

I seek, I seek. What do I find?  
I think I´m so weak.  
I seek, I seek, I seek. What do I find?  
Where´ s the kick in your mind?

Here and there and everywhere,  
once and twice and never.  
Are you here and there and where? You are.  
Can´t you hear my song? I take you ever!

I leave, I leave. Where do I go?  
Conscience is my only thief.  
I leave, I leave, I leave. Where do I go?  
Where´ s your hand? I want to know.

Here and there and everywhere...

I cry, I cry. What do you feel?  
Is it hard to deny?  
I cry, I cry, I cry. What do you feel?  
Where´ s your loving healing? Let´ s make a deal! Get me high!

Here and there and everywhere...

I sought, I sought. What did I find?  
I thought I´m so weak.  
I sought, I sought. What did I find?  
I´ve got the kick in my mind!

Here and there and everywhere...

## **12. THE WAY**

We´re gonna lose our face and our soul.  
We go for shopping, pushing getting cool.  
We live in suburbs of fast food mega-stores,  
a´the cost of nature, what industry ignores.

That´ s the way that I feel  
That´ s the way that I feel

That's the way that I feel  
That is the way that I feel

Turn on your TV, turn on your radio!  
It's all the same, frequency "zero-zero".  
The plastic music is not able 2 come 2 me,  
cause guitar-playing, forever it will be-e.

Forever it will be. For me-e.

Crime organizations dancing sheet to sheet  
with AIDS and cancer, pollution, politics.  
Anger, wars and weapons, whatever will begin,  
My home's my castle. I never let them in.

That's the way that I feel  
That's the way that I feel  
That's the way that I feel  
That is the way that I feel

What they are telling us, I can't hear anymore.  
They don't believe it themselves, it's not 2 ignore.  
The people crying, and I am part of them:  
Kill the devil's party and change in Jesus name.

Come on, change in Jesus name.  
Believe it's not the same.  
Change in Jesus name.

That's the way that I feel  
That's the way that I feel  
That's the way that I feel  
That's the way that I feel...

### **13. PAST IS PRESENT**

springtime in hometown  
new life is on  
big things are all around and you  
listen to nature  
the smallest fine creature  
real life is feeling the truth

past is present  
and present is past  
it turns up and down so fast  
someday's emotions  
take over and win  
now you can start and begin
